

Need a Simple Approach to Lighting Design?

The East Carolina section of the Illuminating Engineering Society invites interior designers, architects and others who want to know the basic rules for good lighting in their architectural spaces to attend this seminar.

Lighting is a key element of interior design, yet sometimes difficult to master. This seminar, based on the book entitled “Lighting Design Basics” by Mark Karlen and James Benya, provides a concise and focused approach to mastering the basics of lighting design. **The seminar will include the following:**

- Light sources for home and business
- How to choose luminaire types
- Layers of light approach
- Switching and dimming
- The professional process including working with lighting designers
- Computers and lighting design
- Simple but reliable point and lumen calculations
- Daylighting – points to remember
- Residential, office, hotel, healthcare, retail, stair and corridor lighting
- Rules-of-thumb for lighting design
- Energy saving lighting design tips
- Practicing what you learn in a group workshop

**Taught by Robert L. Henderson, LC, CLEP, IESNA and
Other guest instructors**
